SUMMARY

Software Developer with hands-on experience building responsive web applications, full-stack solutions, and AI-powered SaaS platforms. Skilled in frontend development, backend integration, and deploying production-ready applications. Quick learner with strong problem-solving skills and a passion for building practical software. Eager to contribute technical skills, learn new technologies, and grow as a developer.

EDUCATION

MSc. in Management Information Systems (MIS) 2026 – Present
Daffodil International University *Dhaka, Bangladesh*

BSc. in Computer Science & Engineering (CSE) 2022 – 2026
Daffodil International University *GPA: 3.54/4.0*

Higher Secondary Certificate (HSC), Science 2019 – 2021
Mohammadpur Preparatory School & College *GPA: 5.0/5.0*

Secondary School Certificate (SSC), Science 2009 – 2019
Dhanmondi Govt. Boys High School *GPA: 4.67/5.0*

WORK EXPERIENCE

AI Solution Developer Feb 2026 – Aug 2026
Daffodil Computers PLC

- Contributed to AIHR, an AI-powered HR SaaS platform, developing AI-powered CV Matching and Performance Management modules.
- Contributed to LLM-powered workflows, background job processing, and multi-tenant application functionality.

Project Associate Sep 2024 – Nov 2024
Prospect Engine LLC

- Supported project coordination, lead generation, and sales-related activities in a remote work environment.

Script Writer Aug 2023 – Oct 2023
PC Builder Bangladesh

- Wrote scripts and prepared content to support the company's content production and publishing activities.

Store Manager & Computer Operator Aug 2021 – Oct 2021
ShopUp – JTI

- Managed routine store operations, record keeping, computer-based tasks, and administrative support.

Salesperson Mar 2019 – May 2019
Shwapno – ACI Logistics Limited

- Assisted customers, supported sales activities, and handled routine retail operations.

TECHNICAL SKILLS

Programming
Python, JavaScript, TypeScript, C, C++, C#, Java, PHP, SQL, HTML5, CSS3

Frontend
React.js, Next.js, Angular, Tailwind CSS, Material UI (MUI), Framer Motion, Vite

Backend
FastAPI, Node.js, Express.js, Laravel, .NET, REST APIs, Authentication, API Integration

Artificial Intelligence
Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), AI Agents, Prompt Engineering, RAG, Speech-to-Text

AI Frameworks & Tools
TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers, Ollama, Whisper

Databases & ORMs
PostgreSQL, MySQL, SQLite, SQLAlchemy, Prisma, Supabase, Firebase

Cloud & DevOps
AWS, Oracle Cloud Infrastructure (OCI), Docker, Git, GitHub, GitHub Actions, CI/CD, Linux (Ubuntu)

Server & Infrastructure
Linux & Local Server Management, SSH, Firewall Configuration, Server Monitoring, Nginx, systemd, DNS Configuration, SSL/TLS, Reverse Proxy, Web Server Deployment, Deployment Troubleshooting

Tools & Productivity
Figma, Canva, LaTeX, Arduino, Cisco, Notion, Google Workspace, Microsoft Office, Jira, ODOO

PROJECTS

AIHR – AI-Powered Human Resources Platform Live
Python, FastAPI, React, PostgreSQL, SQLAlchemy, LLMs

- Developed AI-powered CV Matching and Performance Management modules for an HR SaaS platform.
- Worked with local LLM integration, background job processing, and typed API results to support AI-powered workflows.
- Contributed to a multi-tenant architecture supporting tenant-specific database access and application functionality.

Rookiesdnmco – E-Commerce Storefront & Admin Panel Live
Python, FastAPI, Next.js, React, Tailwind CSS, PostgreSQL

- Developed an e-commerce storefront integrated with an admin panel for product catalogue and order management.
- Worked across frontend and backend integration to support order processing and fulfilment workflows.

Grameen Pest Control – Service Website Live
Node.js, HTML, CSS, JavaScript

- Built a business website featuring pest-control services, service packages, and a project gallery.
- Developed an administrative interface to support content management and website updates.

Classmate+ – Student Productivity App Design Prototype
Figma, UI/UX Design

- Designed a student productivity app concept focused on task organization and study motivation.

Gallbladder Cancer Detection GitHub
Python, TensorFlow, CNN, Deep Learning

- Developed a convolutional neural network (CNN) to classify ultrasound images for gallbladder cancer detection.
- Implemented an image-classification workflow using Python and TensorFlow.

Subtext – Secure Mobile Messaging App Live
Flutter, Firebase

- Built a privacy-focused mobile messaging application featuring decoy chats and secure authentication.
